

## Instructions for Setting Up CTS Wireless Network for Apple Computers

1. The operating system must be Mac OS 10.4.
2. Click on the Airport Card icon in the upper right-hand corner of your desktop.
3. Select 'Other' from the Airport Card drop down list.
4. For Wireless Security, select 802.1x WEP.
5. The network name is CTS.
6. You will be asked for a user name and password. You will enter your CTS user name and password.
7. Authentication will take place, and you will be able to log onto the wireless network.
